## SCIENTIFIC RESEARCH

20 Grants | \$3,623,090

Benaroya Research Institute Seattle, WA	\$361,000	Fluorescence-Activated Cell Sorter – To support biomedical research
---	-----------	---

Central Valley School District Spokane Valley, WA	\$10,000	Synthesizing Life: Investigating PCR, DNA Ligation, and Transformation through Synthetic Biology – For Partners in Science Supplemental–For teacher-partners to implement ideas gained from their research experience into their classrooms
Eastern Washington University Cheney, WA	\$337,500	Partners in Science 2.0 Program at Eastern Washington University – To increase teachers and academic scientists collaborations in advancing science.
Gallatin High School Bozeman, MT	\$10,000	Waterways in Flux: Authentic Student Research Experiences Investigating the Impact of Land Use on River Health – For Partners in Science Supplemental–For teacher-partners to implement ideas gained from their research experience into their classrooms
George Fox University Newberg, OR	\$70,000	Effect of N-Terminal Truncation on High-Order Structure of the Key Eye Lens Structural Protein $\beta$ B1-crystallin – For Murdock College Research Program for Natural Sciences - Physical Sciences
Gonzaga University Spokane, WA	\$69,900	Understanding Climate Data Stored in Native River Mussels – For Murdock College Research Program for Natural Sciences - Life Sciences
Gonzaga University Spokane, WA	\$57,850	Yeast as a Model System to Preemptively Assess Risk of Adverse Drug Reactions in Humans: Measuring Effects of Genetic Variants on Drug Export Pump Function – For Murdock College Research Program for Natural Sciences - Life Sciences
Gresham High School Gresham, OR	\$10,000	Exploring Alternative Energies Through Hands-On Inquiry – For Partners in Science Supplemental–For teacher-partners to implement ideas gained from their research experience into their classrooms
Northwest Nazarene University Nampa, ID	\$337,500	Partners in Science Program at Northwest Nazarene University – To increase teachers and academic scientists collaborations in advancing science.
Oregon State University Corvallis, OR	\$450,000	Composition Measurement System Platform – To strengthen advanced metal and additive manufacturing in the Pacific Northwest
Prince William Sound Science & Technology Institute Cordova, AK	\$386,500	Research Director – To support research for strengthening coastal resilience
Reed College Portland, OR	\$70,000	Role of the Extracellular Matrix in the Regulation of Neuronal Morphology, Architecture, and Behavior – For Murdock College Research Program for Natural Sciences - Life Sciences

Trinity Western University Langley, BC	\$100,000	New Equipment – To train more nurses to serve a growing number of patients
University of Oregon Eugene, OR	\$337,500	Partners in Science 2.0 Program at University of Oregon – To increase teachers and academic scientists collaborations in advancing science.
University of Washington Seattle, WA	\$337,500	Partners in Science 2.0 Program at University of Washington – To increase teachers and academic scientists collaborations in advancing science.
University of Washington Seattle, WA	\$400,000	ELYRA7 Multimodal High Resolution Imaging Platform – To support biomedical research for advancing human health
Whitman College Walla Walla, WA	\$70,000	Study and Characterization of Complex Dynamics in Diode Lasers with Optical Feedback: Insights into Photonic Neuron Behavior – For Murdock College Research Program for Natural Sciences - Physical Sciences
Whitman College Walla Walla, WA	\$70,000	Determining the Translational Activation Mechanism of a Non-Coding RNA in <i>Caulobacter crescentus</i> – For Murdock College Research Program for Natural Sciences - Life Sciences
Whitworth University Spokane, WA	\$69,990	Untangling the Relationship Between Structure and Activity of a Prolyl aminodipeptidase (PepX) and its Application to the Detoxification of Gluten – For Murdock College Research Program for Natural Sciences - Life Sciences
Whitworth University Spokane, WA	\$67,850	Developing Quantitative Biophysical Model to Identify the Mechanisms That Regulate Collective Electrotactic Migration and Proliferation of Isolated Cranial Neural Crest Cells for Tissue Regeneration – For Murdock College Research Program for Natural Sciences - Physical Sciences
